

OUR FIGHT FOR YOUR HEALTH AND SAFETY.

Your health is worth fighting for. In response to the ongoing COVID-19 pandemic, Renown Health is taking extra precautions to ensure a safe environment for your healthcare needs. We are committed to fighting the good fight and continuing to provide exceptional care that you, your family and our community can rely on – now more than ever. If you haven't been able to come in and see us, welcome back. Here's how we're here for you.

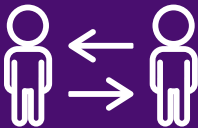

ENHANCED CLEANING AND DISINFECTING.

The 168 members of our environmental services team perform extensive disinfecting measures throughout the day.

FACE MASKS FOR EVERYONE.

All people entering Renown sites shall bring and wear a mask.

KEEPING A SAFE DISTANCE.

Six-foot social distances have been established in all public areas such as waiting rooms, elevators and cafeterias.

MORE ACCESS TO CARE.

Renown providers are offering same-day virtual visits for primary, specialty and urgent care from the comfort of your home using your smartphone, tablet or computer.

HEALTH SCREENINGS.

All employees and patients are screened for respiratory symptoms. If a care provider or employee has a fever, cough, difficulty breathing or signs of respiratory illness, they will not be on a Renown campus. Patients with respiratory illnesses are located in separate areas of our hospitals.

A SAFE PLACE WHEN YOU NEED US.

Staying healthy and safe means seeking care in emergencies, too. Our emergency rooms are open 24/7. Please do not hesitate to call 911 if you or a loved one are in need of emergency medical care.
